

Copilot for Microsoft 365 Adoption Accelerator Workshop

Empower your organisation to maximise the benefits of Microsoft 365 Copilot

Copilot for Microsoft 365 unlocks new possibilities, enhancing operational efficiency, and driving transformational change across your organization.

Atech's adoption accelerator for Copilot for Microsoft 365 is designed to empower organisations to deliver the new way of working that Copilot promises whilst accelerating your business goals. Securing your Copilot for Microsoft 365 goals can only be achieved when the possibilities are embraced by your users - your most powerful asset.

We've tried and tested our user journey to accelerate your success story.

Our Approach

Pre-engagement survey
Gather insights about your organisation's current use of Microsoft 365 applications, environment and goals for Microsoft 365 Copilot.

Copilot for Microsoft 365 Adoption Accelerator Engagement kick-off
This kick-off session will explore high level, engagement structure, role identification and scheduling, unique to your organisation.

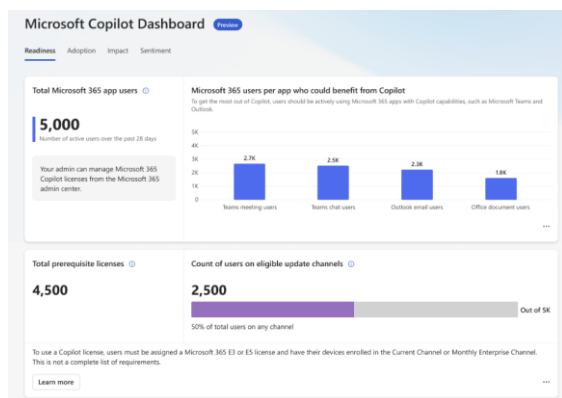

1/2 Day Microsoft 365 Copilot Envisioning Workshop
Focused on identifying key steps to plan for Copilot success including identification of use cases and best practices associated with technical readiness, security, and adoption and change management.

Upon completion of the three-stage approach, we will work with you and your champions to begin the adoption process:

- ➊ Get ready! Understanding your use cases, success criteria, high value stakeholders and hero scenario
- ➋ Create a pilot. Starting with 5-10 identified users to showcase the possibilities
- ➌ Expanding to a department. Focusing the initial extension to a particular department
- ➍ Scale to your entire organisation. Continue to expand department by department

Understanding what success looks like is a critical component of the user adoption within your organisation. We will ensure these goals are set and measured throughout your adoption journey.

Identifying key metrics and showcasing possibilities are achieved using the Microsoft Copilot Dashboard Powered by Viva:
